December 2017

The Fishery Management Reports series was established in 1989 by the Division of Sport Fish for the publication of an overview of management activities and goals in a specific geographic area, and became a joint divisional series in 2004 with the Division of Commercial Fisheries. Fishery Management Reports are intended for fishery and other technical professionals, as well as lay persons. Fishery Management Reports are available through the Alaska State Library and on the Internet: <http://www.adfg.alaska.gov/sf/publications/>. This publication has undergone regional peer review.

ABSTRACT

This document provides an overview of regulations effective for the 2018 Chignik Area state-waters Pacific cod *Gadus macrocephalus* season. The 2018 Chignik Area state-waters Pacific cod season for pot gear is scheduled to open 7 days after closure of the Central Gulf of Alaska (CGOA) federal/parallel Pacific cod pot sector A season or March 1, whichever is later. The 2018 Chignik Area state-waters Pacific cod season for jig gear is scheduled to open by regulation on March 15. Vessels participating in the state-waters or parallel Pacific cod seasons may not exceed 58 feet in length, and legal gear is limited to pot, mechanical jigging machine, and hand troll. No more than 60 groundfish pots or 5 mechanical jigging machines may be operated from a vessel. The 2018 Chignik Area state-waters season Pacific cod guideline harvest level (GHL) is 1,565,982 pounds. Pot gear vessels are allocated 90% of the total GHL (1,409,384 pounds); jig gear vessels are allocated 10% of the total GHL (156,598 pounds).

Key words: Pacific cod, *Gadus macrocephalus*, Chignik Area, management plan, regulations, jigging machine, pot, guideline harvest level, parallel season, state-waters season

INTRODUCTION

AREA DESCRIPTION

The Chignik groundfish registration area consists of all waters on the south side of the Alaska Peninsula enclosed by a line extending south from the Alaska Peninsula near Kilokak Rocks at long 156° 20.22' W and a line extending 135° southeast from Kupreanof Point (lat 55° 33.98' N, long 159° 35.88' W; Figure 1).

OVERVIEW

Two distinct Pacific cod *Gadus macrocephalus* fisheries occur within state waters (0–3 nmi) of the Chignik Area. The parallel fishery is prosecuted concurrent to the federal Central Gulf of Alaska (CGOA) Pacific cod fishery and is managed by adopting most National Marine Fisheries Service (NMFS) regulations and management actions. The Chignik Area state-waters Pacific cod fishery is prosecuted independent of the federal/parallel fishery and is managed exclusively by the Alaska Department of Fish and Game (ADF&G) under guidelines developed by the Alaska Board of Fisheries (BOF).

Parallel Pacific Cod Fishery

When the federal (3–200 nmi) CGOA area is open to directed Pacific cod fishing, ADF&G opens a concurrent parallel fishery inside state waters (0–3 nmi). Unless specifically prohibited, the same gear types in the federal Pacific cod fishery are allowed in the parallel fishery, although nonpelagic trawl vessels are prohibited from fishing inside most state waters in the Chignik Area (5 AAC 39.164(b)(3)).

With the exception of vessels using jig gear, all vessels that participate in the parallel Pacific cod fishery must have an activated vessel monitoring system (VMS; 5 AAC 28.087(c)). Vessels targeting Pacific cod during the Chignik Area parallel fishery may not exceed 58 feet in overall length (5 AAC 28.537(b)).

Vessels that fish exclusively in the Chignik Area parallel Pacific cod fishery are not required to possess a federal fishing permit (FFP) or a Pacific cod gear endorsement administered through the federal License Limitation Program (LLP). Vessels with an FFP should be aware of federal regulations regarding observer coverage, catch reporting, Steller sea lion *Eumetopias jubatus* closures, and LLP requirements prior to participating in the Chignik Area parallel Pacific cod fishery.

In 2017, BOF adopted regulation that reduced the waters closed for the protection of Steller sea lions during the Chignik Area Pacific cod parallel fishery. Under the new regulation, closed waters for pot gear vessels participating in the Chignik Area parallel Pacific cod fishery were reduced from 20 nmi to 3 nmi in state waters around the Sutwik Island haul out ((5 AAC 28.087(b)(4)); Figure 2). Only pot gear vessels that *do not* possess an FFP are permitted to fish within the newly opened area; pot gear vessels that *do* possess an FFP are still required to observe the 20 nmi closure in state waters. All other Steller sea lion restrictions during the Chignik Area parallel fishery match federal management measures.

The parallel Pacific cod fishery is divided into 2 seasons: the A season and B season. The parallel Pacific cod A season opens January 1 to pot, longline, and jig gear sectors. The Pacific cod jig gear sector B season opens June 10. The B season for all other gear sectors opens September 1.

Pacific cod harvested during the parallel fishery is deducted from the federal gear-specific sector harvest allocation. Parallel Pacific cod seasons for the pot and longline sectors close when their respective sector harvest allocations are achieved. The parallel Pacific cod A season for the jig gear sector closes when the jig gear sector harvest allocation is achieved, or March 15, whichever is earlier.

For additional information regarding federal Pacific cod regulations and harvest updates, contact NMFS Sustainable Fisheries Division (1-800-304-4846 #3), NMFS Office of Law Enforcement (907-486-3298), or the NMFS Observer Program (206-526-4195). For other information regarding the parallel fishery, contact ADF&G in Kodiak (907-486-1840; Appendix A1).

State-Waters Pacific Cod Fishery

State-waters (0–3 nmi) Pacific cod fisheries are open access fisheries and are prosecuted independent of federal/parallel fisheries. Information specific to the 2018 Chignik Area state-waters Pacific cod fishery is outlined below.

STATE-WATERS PACIFIC COD REGULATIONS

OVERVIEW

Regulations pertaining to the Chignik Area Pacific cod fisheries begin on page 49 in the 2017–2018 Statewide Commercial Groundfish Fishing Regulations booklet. ADF&G manages the Chignik Area state-waters Pacific cod season in accordance with the *Chignik Area Pacific Cod Management Plan* (5 AAC 28.537). The following is a summary of important regulations that will govern the 2018 Chignik Area state-waters Pacific cod season.

2018 GUIDELINE HARVEST LEVEL

The guideline harvest level (GHL) for the state-waters Pacific cod season is based on 8.75% of the CGOA Acceptable Biological Catch (ABC) for Pacific cod. The 2018 GHL for the Chignik Area state-waters Pacific cod fishery is 1,565,982 pounds. By regulation, 90% of the total GHL (1,409,384 pounds) is allocated to pot gear vessels and 10% of the total GHL (156,598 pounds) is allocated to jig gear vessels.

SEASON DATES AND GHL ROLLOVER PROVISIONS

Pot Gear

The 2018 Chignik Area state-waters Pacific cod season for pot gear will open at 12:01 AM March 1 or 7 days after closure of the CGOA federal/parallel Pacific cod pot gear sector A season, whichever is later. The state-waters season for pot gear will close when the Chignik Area Pacific cod pot gear GHL allocation has been harvested.

If the state-waters pot gear GHL allocation has not been fully harvested by August 28, the state-waters pot gear season will close on August 28 to allow the CGOA federal/parallel Pacific cod pot gear sector B season to open on September 1. A summary of state-waters and parallel season dates is located in Appendix C1.

Jig Gear

The Chignik Area state-waters Pacific cod season for jig gear will open by regulation on March 15. If the CGOA federal/parallel jig gear sector A season has not closed by March 15, ADF&G will close the parallel (0–3 nmi) jig gear season and open the Chignik Area state-waters Pacific cod season for jig gear.

If the state-waters jig gear season opens prior to closure of the federal jig gear sector season, the Chignik Area state-waters (0–3 nmi) season will be prosecuted concurrent to the federal (3–200 nmi) CGOA jig gear sector Pacific cod season. Vessels that participate in the Chignik Area state-waters season will be subject to state fisheries regulations, and all Pacific cod harvested will be deducted from the Chignik Area state-waters jig gear GHL allocation. Vessels that participate in the federal CGOA jig gear sector season will be subject to federal fisheries regulations, and all Pacific cod harvested will be deducted from the federal CGOA jig gear sector harvest allocation.

The Chignik Area state-waters Pacific cod season for jig gear will close when the Chignik Area Pacific cod jig gear GHL allocation has been harvested. If the Chignik Area state-waters jig gear GHL allocation has not been fully harvested by June 8, the state-waters jig gear season may close on June 8, based on inseason assessment of effort, harvest rate, or remaining state-waters GHL, to allow the CGOA federal/parallel Pacific cod jig gear sector B season to open on June 10. The state-waters season for jig gear will reopen after closure of the CGOA federal/parallel Pacific cod jig gear sector B season if the Chignik Area state-waters jig gear GHL allocation has not been achieved. A summary of state-waters and parallel season dates is located in Appendix C1.

Concurrent Fisheries

When the Chignik Area state-waters season and the federal Pacific cod season are open concurrently for the same gear type:

- vessels may not simultaneously participate in the Chignik Area state-waters season and any other Pacific cod season;
- vessel operators registered for the state-waters season must invalidate their ADF&G Chignik Area state-waters Pacific cod registration prior to participating in a federal Pacific cod season;
- vessel operators participating in a federal Pacific cod season must register with ADF&G prior to participating in the Chignik Area state-waters Pacific cod season;

- all Pacific cod must be delivered prior to validating or invalidating a Chignik Area state-waters Pacific cod registration; and
- vessel operators may validate or invalidate vessel registrations by contacting ADF&G in Kodiak (907-486-1840) during normal state business hours (Monday–Friday, 8 AM to 4:30 PM).

GHL Rollover Provisions

The Chignik Area Pacific cod management plan provides late-season fishing opportunity when the GHL is not fully harvested. If Chignik Area state-waters GHL is available on August 15, the state-waters Pacific cod season may reopen to both pot and jig gear, and gear limit restrictions may be removed. If a substantial portion of the state-waters season GHL remains unharvested on or after October 30, vessel size restrictions may be removed to facilitate full harvest of the GHL. All actions regarding GHL rollover provisions will be announced by ADF&G news release.

VESSEL REGISTRATION REQUIREMENTS AND SIZE RESTRICTIONS

The Chignik Area is a superexclusive registration area for Pacific cod. Once a vessel is validly registered for the 2018 Chignik Area state-waters Pacific cod season, that vessel may not be used to take Pacific cod in any other state-waters Pacific cod management area during 2018. Conversely, a validly vessel registered for any state-waters Pacific cod season outside of the Chignik Area during 2018, may not participate in the 2018 Chignik Area state-waters Pacific cod season. The Chignik Area superexclusive registration requirements do not apply during a parallel Pacific cod fishery.

Pacific cod vessel registrations may be obtained in person at ADF&G offices in Kodiak and Dutch Harbor, or by fax or email. A 2018 Commercial Fisheries Entry Commission (CFEC) interim-use miscellaneous finfish permit card for the appropriate gear type must be obtained prior to registration. CFEC and other fishery related contact information is provided in Appendix A1.

Tender vessel operators must obtain a tender vessel registration for the state-waters Pacific cod fishery. Tender operators may target Pacific cod with either pot or jig gear while operating as a tender vessel. Separate fish tickets must be completed for fish landed by the tender vessel and for fish taken from other fishing vessels.

Pacific cod may not be taken by vessels greater than 58 feet in overall length during the Chignik Area state-waters Pacific cod season unless the vessel length restriction is removed by ADF&G on or after October 30.

LEGAL GEAR, GEAR LIMITS, AND POT BUOY TAGS

Pot, mechanical jigging machine, and hand troll gear are the only legal gear types during the state-waters Pacific cod fishery. Vessels may not use pot and jig gear at the same time; however, vessel operators may change gear registration by contacting the Kodiak ADF&G office (Appendix A1).

During the state-waters season, groundfish pots of any size may be used to take Pacific cod, although individual tunnel eye openings on pot gear must be 36 inches in perimeter or less. All pots must be equipped with a biodegradable escape mechanism (5 AAC 39.145). The biodegradable escape mechanism is an opening 18 inches or greater in length placed within 6

inches of the bottom of the pot and secured closed by a single length of untreated, 100% cotton twine no larger than 30 thread count. No more than 60 groundfish pots may be operated from a vessel unless the pot limit has been rescinded by ADF&G emergency order on or after August 15.

Buoy tags are required for pot gear when the 60-pot limit is in effect. Tags must be placed on the main or trailer buoy and are available at ADF&G offices in Kodiak and Dutch Harbor for \$1.50 per tag. Tags may be mailed through the U.S. Postal Service if paid for prior to shipment. Buoy tags may also be seasonally available at the city office in Chignik and from local processors in Sand Point. A valid 2018 miscellaneous finfish CFEC permit card for pot gear is required to receive tags. Contact ADF&G in Kodiak at 907-486-1840 for additional information on buoy tags.

If buoy tags are lost during the season, replacement tags may be obtained by contacting ADF&G in Kodiak. The vessel owner, operator, or agent must complete and submit an affidavit form to ADF&G describing how tags were lost and the location and unique number(s) of each lost tag. Pots with lost tags may remain in the water, but those pots must be secured open with bait and bait containers removed until replacement tags are attached.

Vessels using mechanical jigging machines are restricted to using no more than 5 machines unless the gear limits have been rescinded by ADF&G on or after August 15. Each of the 5 permissible lines may have no more than 30 hooks. There are no limits on the amount of hand troll gear that may be operated from a vessel. Vessels may operate both hand troll and mechanical jigging gear at the same time; however, separate CFEC permit cards and fish tickets are required for each gear type at the time of landing.

POT BUOY MARKING REQUIREMENTS

Buoys attached to groundfish pots must be marked with the permanent ADF&G vessel number of the vessel operating that gear (5 AAC 28.050 and 5 AAC 28.530(c)). The buoy containing the 5-digit ADF&G number may not be marked with any additional numbers; however, symbols and letters are acceptable. Trailer buoys used to mark ownership or string sequence may be marked with any desired numbers, symbols, or letters.

POT STORAGE AND GEAR CONFIGURATION

All pot gear must be open and unbaited at the time of a parallel or state-waters season closure. Open and unbaited pots may be stored at any depth for a maximum of 7 days following the closure date. After 7 days, pots must be removed from the water or stored opened and unbaited in waters 25 fathoms or less.

If the time period between closure of the CGOA federal/parallel Pacific cod pot gear sector A season and the start of the Chignik Area state-waters pot gear season is more than 7 days, all pot gear inside state waters (0–3 nmi) must be placed into legal storage (25 fathoms or less). However, during the 7 days immediately prior to the Chignik Area state-waters season opening, open and unbaited pot gear may be stored on the fishing grounds (greater than 25 fathoms).

When the state-waters season opens, the 60-pot limit is in effect. During the 7 days after the state-waters season opens, a vessel may store or transport pots in excess of the 60-pot limit only if those pots are stored open and unbaited in waters 25 fathoms or less or being transported onboard a vessel. After the 7-day period, registered vessels may not operate more than the

maximum allowable 60 pots for the remainder of the state-waters season. Following closure of the state-waters season vessel operators may not stack out or move gear into storage while Pacific cod is on board the vessel (5 AAC 28.070(c)(1)).

Contact NMFS Enforcement (Appendix A1) regarding gear storage in federal waters.

LANDING REQUIREMENTS

Vessels participating in the state-waters Pacific cod season are required to deliver their catch within 48 hours after a closure unless 1) cod were harvested as allowable bycatch in another directed fishery, or 2) the vessel is delayed due to extraordinary circumstances and the vessel operator has contacted an ADF&G representative within 48 hours following the closure and has been granted additional time to reach the port of landing (5 AAC 28.541).

BYCATCH

In state waters (0–3 nmi), ADF&G adopts the NMFS maximum retainable bycatch percentages applicable in federal waters (3–200 nmi) for groundfish species that are not actively managed by the State of Alaska. Federal retainable bycatch status is subject to change and may differ between species. Updated retainable bycatch status for federally managed species are announced via information bulletins on the NMFS Alaska Region website at <https://alaskafisheries.noaa.gov/infobulletins/search> or contact NMFS Enforcement in Kodiak for current bycatch percentages and status (Appendix A1).

Unless otherwise specified, the maximum bycatch limit for any species of groundfish is 20% by weight of the targeted Pacific cod onboard a vessel. Lingcod *Ophiodon elongatus* may only be retained from July 1 to December 31 and must be 35 inches or greater in length from tip of the snout to the tip of the tail. During a state-waters or parallel Pacific cod fishery, octopus may only be retained as bycatch up to 20% by weight of Pacific cod onboard the vessel and must be landed on the miscellaneous finfish card used to deliver Pacific cod (5 AAC 38.417). Black rockfish *Sebastes melanops* may be retained up to 5% by weight of Pacific cod onboard a vessel. Jig vessels concurrently registered for a Chignik Area Pacific cod season and the Chignik Area directed black rockfish season may retain black rockfish in excess of the 5% bycatch limit when the Chignik Area directed black rockfish season is open to commercial fishing. Contact the ADF&G office in Kodiak (907-486-1840) regarding retainable bycatch percentages for state managed species.

CATCH REPORTING

ADF&G will manage the Chignik Area state-waters Pacific cod season using inseason catch reports provided by vessel operators. Vessel operators using pot gear are encouraged to report daily the harvest location, number of pot lifts, and pounds of Pacific cod retained in the previous 24-hour period (midnight to midnight). Inseason catch reports allow ADF&G to consider how changes in effort, fleet behavior, tides, and weather influence harvest rates. Catch reports will be taken by satellite dispatch (7894), phone (907-486-1840), or email (natura.richardson@alaska.gov). Reporting worksheets will be issued to vessel operators during registration (Appendix B1).

Reports taken by satellite dispatch will occur between 10:00 AM and 11:00 AM daily.

INSEASON ANNOUNCEMENTS

All actions pertaining to regulatory changes in the state-waters season will be communicated to the fleet by satellite dispatch, distributed via the ADF&G news release email subscription service (<http://www.adfg.alaska.gov/index.cfm?adfg=cfnews.main>), and relayed through participating processors and National Weather Service marine weather VHF forecasts when possible. ADF&G will make every effort to provide sufficient advance notice prior to a closure; however, the potential exists for a short advance notice closure.

A weekly harvest update will be distributed each Monday after 4:00 PM while the state-waters season is open. Weekly harvest updates are available on the ADF&G website at <http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareachignik.groundfish#harvest> or from the ADF&G groundfish management office in Kodiak.
